

Instruction of the assembly and the opening of the umbrella

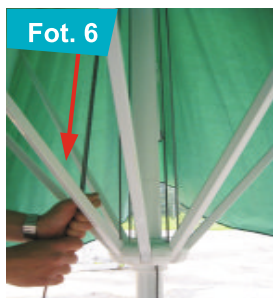

1. Before unfolding the umbrella you should prepare the truss on the designated place with the concrete slabs. Do this on an even ground. (Photo. No 1)

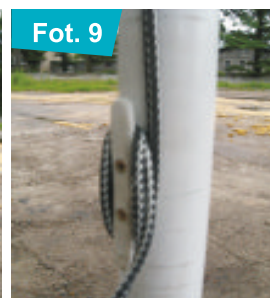

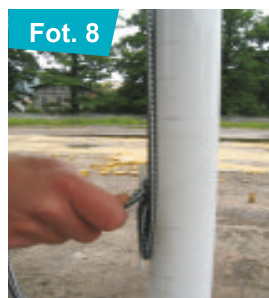

2. Take off the cover of the umbrella (Photo. No 3). Connect the upper and lower part of the pole and secure with the screw (Photo. No 2). Put the umbrella on the base and secure it with the screw (Photo. No 4). The properly on the base secured umbrella is presented on photo No 5.

3. A properly on the base secured umbrella can now be opened safely. To open the umbrella you should equally pull the string, which opens the umbrella (Photo No 6). After you completely open the umbrella you should right away insert the security pin to avoid the unfolding of the umbrella (Photo No 7).

4. After you have secured the umbrella with the pin roll the rest of the string on the hook (Photo. No 8 and Photo. No 10). You should not leave the pin like presented in Photo. No 10.

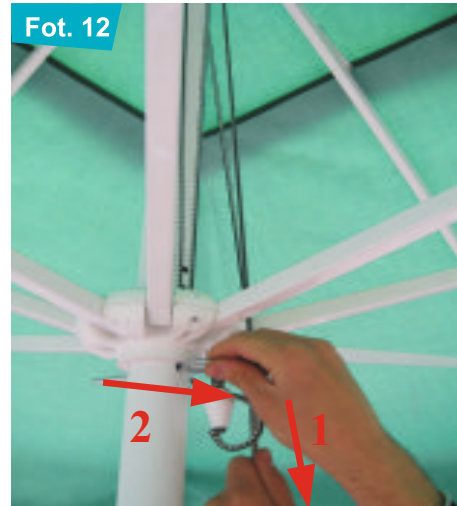

Instruction of the dismantling and closing

1. While dismantling the umbrella you should first undo the string from the hook (Photo. No 11).

2. After you undo the string pull it a little to unblock the safety pin (Photo. No 12).

3. After you undo the string and unblock the safety pin slowly release the string until the umbrella is fully closed (Photo. No 14).

4. After you close the umbrella you should remove the safety screw (Photo. No 15) and secure the umbrella by packing it into the safety cover (Photo. No 16).
